for

SEA WALLS

BANK PROTECTION

GROYNES & BREAKWATERS

TEMPORARY STRUCTURES

ELCOROCK®

are extremely robust geotextile containers designed to be filled with sand, soil, gravel, recycled material, treated materials or a combination of the above, such that they form a stable, durable long term container solution.

- Australian manufactured in accordance with ISO 9001:2000 Quality Assurance System.
- Specifically manufactured non-woven needle-punched staple fibre geotextile.
- Environmentally friendly, sustainable, cost effective solutions.
- Ability to harmonise with the local eco system.
- UV Resistance.
- Highly durable and flexible.
- Easily installed, buildable solutions.
- Sizes range from 40kg to 400t containers and tubes.
